Serving A Most Progressive People In The Most Prosperous District In Central Alberta

VOL. 8, NO. 35

MIRROR, ALTA., JUNE 22, 1922

\$2.00 PER YEAR

Voiles and Marquissettes

We have them in Dress Lengths and by the yard. There are no two pieces alike, therefore no danger of two ladies having the same pattern. Something for every taste and fancy. Marquissettes, Brown and blue with beautiful floral designs. Voiles, Blue with satin stripe and considerable white which relieves the plainness. Cream with floral and cheek design. Blue with white and colored stripe. Sky with cream flower. White with mauve stripe and flower, and several other pieces. Just come in and look them over and be convinced of their beauty and quality.

Bungalow Aprons

A good assortment to choose from in light and dark floral designs, light and dark stripes, also figured. They are very reasonably priced and much cheaper than you could buy the goods and make them. Prices ranging from 95c to \$2.25.

Girls' Gingham Dresses

Just the thing for the little girls, so cool and economical. In all colors, Pink, Check, Dotted, Blue, Stripe and Brown. Get your choice while the getting is good.

Gents' Trousers

We have a special on Trousers and they are surely a bargain at the price. Something for every day or knockabout. Just come in and look them over, they are all we say they are, a real bargain.

Gentlemen: How about a New Suit? Our new styles and samples are in and needless to say a guarantee with every suit if not satisfactory in every way, your money refunded. Can you beat that. The House of Hobberlin excels in clothes.

Groceries

We stock only the best lines and give satisfaction on every purchase. The quality remains long after the price is forgotten.

BUSINESS OF THE LOCAL AND DISTRICT NEWS

L. M. D. NO. 398

The Council of the Municipal District of Lamerton, No. 398, met at the municipal office at 11:30 on Saturday, June 10th, 1922, at 2 p.m.

All the members of the council were present with Reeve J. E. Merrifield in the chair.

The minutes of the council meeting held May 13th were read and were confirmed on a motion by Mr. Jewell.

Messrs. Johnston and McLeod waited on the council with regard to Martin Ende, a blind man living on the Mirror subdivision and whose shack was burned down some time ago.

The secretary reported that, at the request of Mr. Jewell, he had taken the matter up with the department to find out if there was a home for the blind in the province. This had been answered in the negative, and the ordinary homes for aged people had been referred to.

The question of making a donation towards the erection of a new house was discussed, and on a motion of Mr. McMillan, Mr. Jewell was appointed a committee of one to attend to the case.

Regarding the case of J. S. Smith, which again came up for discussion, it was resolved on a motion by Mr. Sherburne that nothing should be done by the council.

An account from Mrs. Jas. Steele, Mirror, for attending the Fall-Off faulity whilst quarantined was passed for payment, subject to the approval of Mr. Jewell.

The claim of A. G. Bergquist re care of Mrs. Rasmussen's child came up for discussion; Mr. McMillan reported that he had come to an agreement with the claimant for a settlement by the district paying \$145.

The account was passed for payment on a motion by Mr. McMillan.

Regarding the account of Dr. Haworth, Erskine, re the Wm. Russell family of Nevis, the secretary reported that Dr. Haworth had referred the matter to the department, after the council had turned his account down. The secretary was instructed to write the department that the council were willing to pay as far as the case of 'Hu' was concerned, (this being a matter of public health) but failed to see why this district should pay the account re confinement. The matter was ordered held over pending further investigation by Mr. Merrifield.

Payment was authorized to the owner of the land used in a division of S. W. 34-4 on a motion by Mr. Sherburne.

On the motion by Mr. Tallman, it was agreed that the district pay for the construction and maintenance of a railway crossing on section 3-30-23-4.

The claim of S. W. Code, Edmonton, for the payment of surplus from the proceeds of the pound-sale of impounded horse, was brought up again, and the secretary was instructed to demand an affidavit as to the ownership.

A letter was read from Benj. Lawton, Chief Fire Guardian, requesting that the council appoint a fire guardian in each division. On a motion by Mr. Forcht, it was resolved that each councillor act as a fire guardian in his own division, and according to the request of Mr. Lawton, the reeve be chief fire guardian of the municipal district.

A letter was read from W. J. Stephen, Commissioner, of the Department of Agriculture, having reference to the appointment of weed inspectors. The secretary was instructed to reply that this district was not badly affected and that each councillor was looking after his own division.

At 4:20 p.m. the council meeting was adjourned to sit as a court of revision on the Wild Lands Tax Assessment.

The secretary reported that the Hudson's Bay Company claimed exemption on all their lands in this district with the (Continued on page 8)

LOCAL AND DISTRICT NEWS

School closes for the summer holidays on June 30th.

Mrs. J. H. Smith, of Calgary, visiting her daughter-in-law, Mrs. C. F. Smith.

Mrs. I. M. Bergeron is very ill and her daughter, Miss Ruth, of Edmonton, has been sent for. Mr. and Mrs. Chase, Ray and family were Sunday visitors at Mrs. Stenerson's, east of Bashaw.

Rev. Malcolm Pearl, of St. Monica's, was at Pastor on Sunday last, taking charge of the service.

Mr. and Mrs. Walker and Miss Docherty, of Alx, Sundayed at Mr. and Mrs. A. G. Brohman's.

Proof of the pudding is in the eating thereof. Thousands praise Taulac. So will you. N. J. Devereaux.

If you feel tired, worn out, nervous and all unstrung, take Taulac. It will straighten you out. N. J. Devereaux.

Mr. and Mrs. J. A. Aetle, Mr. Chris. Albers and family, and Mrs. A. G. Brohman were visitors at Mr. and Mrs. Geo. Neis' on Tuesday evening.

Mrs. F. A. Durrant, son and two daughters, of Matlock, Derbyshire, Eng., arrived in Mirror last Friday.

Mr. Durrant went to Telford to meet them.

Taulac overcomes rheumatism by toning up and invigorating the vital organs, thereby enabling them to eliminate poisons from the system. N. J. Devereaux.

The U. F. A. meeting in the town hall on Wednesday evening was fairly well attended.

Speakers of the evening were the Hon. Fred Parry and L. S. Foreman, a director of the U.F.A.

The crops in the Mirror district are in very good condition the result of the past week having applied moisture that was urgently needed. About an inch of rain fell last Friday, and there was another shower on Monday evening.

Donald, son of Mr. and Mrs. Melvin Olsen was taken to the Calcutta hospital on Sunday afternoon and operated on for appendicitis the same evening. He was accompanied by his parents, Dr. McLennan and aunt, Mrs. Jas. MacKirdy. The operation was a complete success.

The members of the Finance Committee of the Mirror Union church wish to take this opportunity of thanking all the members of the Mirror community, who helped so largely in making the Jumble Sale of Saturday a huge success. The proceeds amounted to \$122.15, expenses \$6.00, balance \$116.15. This amount has been applied on the church indebtedness for 1921. The Finance Committee of the Union Church, per Secretary.

A special meeting of the village council was held last Tuesday afternoon to consider application for licenses for restaurants and sale of soft drinks. The application for approval of provincial licenses for Messrs. Sears, Brackley, Hickman, Stump, Hazell and Yee Lee were approved. An amendment to the present village license by-law, to charge \$2.00 for village licenses was given a first reading.

Masonic Service

The members of Ancient Landmark Lodge, No. 100, A.F. & A.M. Mirror, will attend divine service in the Union church on Sunday evening, June 25th, at 7:30 o'clock. A cordial invitation is extended to all visiting brethren to attend at the lodge room at 7 o'clock. Rev. J. E. Collins will preach.

Government Decides To Sell Part Of The Merchant Marine Fleet

Ottawa.—Hon. W. C. Kennedy, Minister of Railways and Canals, announced in the House that twenty-seven of the smaller vessels of the Canadian Government Merchant Marine are to be sold up this year and disposed of when possible.

The House at this time had under consideration a vote of \$1,469,720 to provide a loan to the Canadian Government Merchant Marine.

The amount is to be applied in the payment of deficits in the operation of the company during the year ended December 31, 1921; to working capital and deficits in connection with operation during the fifteen months ending March 31, 1922; and capital expenditure in connection with the vessels.

Hon. T. A. Cresser advised the Government not to be too hasty in disposing of the ships. He agreed that Canada should not be called upon to pay annual deficits of large proportions on the merchant marine but thought that better prices might be secured for the vessels in a year or two than would be obtained now.

T. L. Church (Conservative, North Toronto) voiced strong opposition against any move to do away with the merchant marine.

Re-establishment of service between Atlantic and Pacific ports in Canada was advocated during the discussion.

The lion under consideration was an appropriation of \$10,665 for the Canada-West Indies service and the suggestion came from Hon. H. H. Stevens, Vancouver.

Funeral of Sir Ross Smith
London.—(Inter.)—A correspondent cables that the body of Sir Ross Smith, the famous Australian aviator, who was killed a few weeks ago in an airplane accident in England when testing the machine which was designed to carry him around the world, was landed there and interred.

Studied British Livestock Markets
Ottawa.—(Inter.)—A commercial editor of the Manitoba Free Press, is en route home from a trip to the British Isles, where she studied the livestock marketing situation.

Plan To Create New Wheat Board Is Now Approved

Ottawa.—The House has approved the report of the committee on the recommendation of a wheat marketing agency to handle the 1922 crop. Under the terms of the committee's report, the marketing agency is not to be given the direct handling of flour and mill products and the act creating it is to be effective by proclamation as soon as two or more of the provinces have agreed upon this agency such powers possessed by the wheat board of 1919 as come within provincial jurisdiction.

There was protracted discussion on the respective merits of the compulsory and the voluntary pool. Right Hon. Arthur Meighen, leader of the Opposition, complained that the wheat board was being submitted to a long and cruel process of strangulation and the House should not be asked to put in the final stab. He favored a voluntary board. The Opposition policy was subsequently expressed in an amendment submitted by Donald Sutherland of South Oxford, calling for reference of the report back to the committee with a mandate with instruction to amend it so as to read:

"It is desirable that the national interests that the Government immediately create a national wheat marketing agency, similar to the Canada Wheat Board of 1919, but on a voluntary basis, fully in accordance with the powers of Parliament, for the marketing of the wheat crop of 1922, and that to this end Federal legislation be introduced immediately, such legislation to provide further that the said board may, with the approval of the governor-in-council, exercise such other powers or duties as may be com-

Illegal Traffic in Drugs

Government Proposes Draconic Means to Stamp Out Evil

Ottawa.—The peddling of drugs to minors is to be made liable to the death penalty, and his minimum term of imprisonment will be increased to seven years, if a bill which went through the House of Commons receives the approval of the Senate. The bill amends the Opium and Narcotics Act, and, as it left the committee, adds other sweeping penalties for the drug trafficker. It provides among other things that:

(1) Drug traffickers may be imprisoned without limit the option of a fine.

(2) Right of appeal forbidden to those convicted in a lower court of trafficking in drugs, except in a stated case on a point of law.

(3) Aliens convicted of illegal trafficking in drugs liable to deportation after serving their sentence.

Plea for a tightening of the penalties on drug traffickers came chiefly from British Columbia members, L. J. Leithers, Conservative, Vancouver South, submitted the amendment for the bill. Men who supplied habit-forming drugs to minors and adults should be whipped, he declared. The amendment went through with little opposition, although Hon. D. McKeen, Minister of Justice, took the view that the bill might cripple a man for life.

Indian Federation Impracticable
London.—"To go as public opinion stands where it is today, West Indian Federation is the larger concern is impracticable," is the conclusion of the report of Major R. P. L. Wood, parlia- mentary secretary of the colonies, in his recent visit to the West Indies. Major Wood points out that the primary and most serious difficulty in the way of federation is the great distances separating the colonies.

Negotiations on Mandates Progressing
London.—Cecil Harmsworth, under-secretary for foreign affairs, told the House of Commons that good progress had been made in negotiations between Great Britain and the United States with regard to territory to be held under the "A" and "B" mandates, when he was questioned on the subject. He hoped the complete agreement would be reached soon.

The shrimp industry of Louisiana employs more than 20,000 people.

Team Representing Canada Will Sail On June 24
Ottawa.—The rifle team to represent Canada at the competitions of the I.R.A. of Great Britain will assemble in Montreal, Friday, June 23, and sail on the White Star S.S. Canopic the following day. Plan for Restoring Former Dual Monarchy

Powers Asked to Give Austria Twenty Year Credit

Paris.—The Allied Council of Ambassadors decided to request the four remaining governments, creditors of Austria, who have not yet renounced their claims against her, to do so for a period of twenty years. The desire is thus to reverse the application of the credit system which has been elaborated for the restoration of the former dual monarchy.

Charles Benoist, French Minister of the Hague, headed the delegation which France sent to The Hague. This delegation, however, only attended the preliminary meeting. June 15, the experts not being expected to arrive until later, about June 25.

The German Government justified the Reparations Commission that it would pay the regular monthly instalment of 50,000,000 marks on the date fixed for this payment. The commission is awaiting word from Germany as to what measures she intends to undertake. The commission's ultimatum now that the international loan has failed to materialize. The commission, it was announced, will send another note to Germany requesting further financial improvement in the budget and arrangements for financial reforms.

Semenoff Returns to Orient

Cossack General Was Recalled by Petition from Siberians

Vancouver.—Recalled to Asia by petitions which are said to contain names of numbers of Siberian, General Gregory Semenoff, chief of the Cossacks, called from Vancouver for the Orient on the Canadian Pacific liner Empress of Asia. General Semenoff will proceed direct to Harbin, Manchuria, and from there will be directed by the counsel of his advisers.

General Semenoff, it is said, is returning somewhat buoyed up in hopes and expectations on account of information which he gathered when on his visit to the United States. He was glad to be back in Canada and said he enjoyed the rest he experienced while under the Canadian flag. His United States experience had been somewhat strenuous, but he voices no criticism of the United States Government, though speaking freely of individuals who were active in opposing him.

China Appoints Foreign Minister

Dr. Yen Will Fill Post in New Central Government

Peking.—Dr. W. W. Yen, former foreign minister, has been appointed to that post in the new Central Chinese Government. Dr. Yen has been in the United States since the Chinese Government, though speaking freely of individuals who were active in opposing him.

Approval Is Given To Bill To Prevent The Export Of Liquor

Radio Messages on Canadian National Trains

Vancouver.—What is said to be the first time in the history of radioing in Canada, the experiment of sending passenger train messages from a moving passenger train has been tried on the Transcontinental Limited of the National Railways. Messages were received from Vancouver on board a train when it was in the vicinity of Hage, B.C., eastbound from Vancouver. The messages were received perfectly, until the train ran into an atmosphere that was disturbed by an electrical storm overhead and interruptions were frequent. Should the experiment prove successful, it is possible that all Canadian National trains operating in the west will be equipped with radio, it is stated.

Mennonites Wish to Return

Saskatchewan Man Who Went to

Alaska Makes Bad Move
Ottawa.—An interesting report on the movement some time ago of the Mennonite settlers from Western Canada to the United States is just received in the form of an appeal received by the Department of Immigration and Colonization for assistance in returning some of these settlers to Saskatchewan. The appeal comes in a letter from a former settler in Alaska, Alaska, who writes from Millay, Alaska. After pointing out that conditions have not been such as he expected to find, this settler writes:

"We would like to hear from you if it would be possible for your government to help us out. I mean if it would be possible to loan us money to get back to our farms again. I cannot stay here as we are so much in debt now that we don't know what will become of us, I pray you to help us out. My intention never was to leave Canada, but I was talked into doing so and I am very sorry that I did."

Find First Series Of Gold Coins

Unearthed in Ruins of Sardis by U.S. Archaeologists

New York.—Thirty gold coins belonging to the first series of gold coins ever minted have been unearthed by United States archaeologists working in the buried ruins of Sardis, Turkey. The coins were discovered by Dr. F. Lewis Bliss, Columbia University, one of the members of the expedition who was present when the coins were discovered. The coins were minted under the reign of the Persian King Cyrus, and were captured by Cyrus, the Persian King.

Ottawa.—Hon. Hugh Guthrie (Conservative, Wellington South) objected in the Commons to the bill amending the Canadian Temperance Act on the ground that it might result in the seizure of liquor in bonded warehouses given a fair opportunity for disposal of their stocks. He suggested that warehouse owners should be given at least six months for his purpose.

Mr. Guthrie said that the bill proposed to grant provincial governments the right to forbid further exports from warehouses by provincial order-in-council.

Hon. D. McKee, solicitor-general, who was pointing the bill, said that the object of the section in question was to deal with the illegal sale and disposing of liquor by carrying it in some of the provinces. He did not want any steps which would lead to the confiscation of any person's property. The bill could not be put into effect in any province until the provincial government passed an order-in-council asking that it come into force.

The Solicitor-General believed that if any persons conducting a lawful trade in alcohol in a province refused not to bring the law into effect until he had an opportunity of disposing of his stock, his representatives would be arrested.

Hon. W. B. Motherwell said the trouble arose through the long delay in carrying the law into effect on the liquor question in Saskatchewan and the coming into effect of the law. During that time, some of the 25 export houses were up and many carloads of liquor were shipped to them. The question was how long the goods should be given to dispose of their stocks. "It means we have to find out about how it takes to find a million dollars worth of booze," he added.

S. W. James (Liberal, George Dismore) did not agree with the Solicitor-General that the goods were being illegally. If such was the case, why did not the customs officers act against them? "The law was impossible for the owners to sell except in Europe. If therefore moved that no action should be effective until January 1, 1922."

A. J. Lewis (Progressive, Swift Current) concurred in the judgment of the Solicitor-General. Those who were familiar with the situation in Saskatchewan, knew that these liquor houses were being operated. These export houses had forced themselves in the province against the expressed will of the people, and the sooner they were to go the better. If any period of delay was to be granted, it should be at the discretion of the government of Saskatchewan.

The amendment carried and the bill was reported from committee.

Bringing Rural Residents Within Closer Reach Of The Urban Dweller

Human necessity and traffic requirements must be the guiding principle in the selection and location of any system of highways, rather than adherence to an artificial system of straight lines. Hon. S. J. Latte declared in his presidential address at the annual convention of the Canadian Good Roads Association held in Victoria recently. To this end, he claimed, the following details should be considered:

The greatest good to the greatest number: most direct route possible for traffic; avoidance of sharp curves; avoidance of steep grades; minimum construction cost; economy of maintenance; correlation of each road section with the character of the country; the system; relation of the road as a feeder to railways; drainage facilities; proximity of road material; future requirements; necessity for bridges and culverts; money available for the project proposed.

The advantage of careful scientific planning could not be over estimated. A well-planned road system would build up manufacturing industry, disperse cost of raw materials, reduce cost of living by bringing rural residents within closer reach of the urban dweller, increase settlement and elevate the social life of the community. The type of road to build on any part of a settlement is determined by the character of the land which will go over that road at least possible expense. Drainage was important and the grade of the road must be such that it will be employed in its proper location.

In location of a system, care must be taken to select material capable of being finished by taxpayers concerned, and the same principle must be followed in the choice of type of road building was a great cooperative enterprise. Taxpayers of any given community should co-operate with each other in the interest of the community. Distribution of funds depended on ability to contribute and the benefit derived from the quality provided. Provincial aid to the communities ought to be given on the same basis. It was quite evident, he said, that the result is that the population is not shown at its true figure. Reliable authorities estimate the actual population of Hong Kong at about three-quarters of a million.

Unlike Great Britain and most other countries, Hong Kong has a great excess of males over females. The figures, as revealed by the census, are: Males, 230,731; females, 226,375. As only one to the male ratio is maintained, it is not shown at its true figure. Reliable authorities estimate the actual population of Hong Kong at about three-quarters of a million.

Emphasizing the magnitude of the road-building problem, the president declared that the relatively small population spread over an immense area, from a family of four persons—less than the average—over the land, the responsibility of building and maintaining one mile of roadway and over average families, the construction of the infrastructure of a small city market highway. Before more roads are built or extended, land areas are limited, and the population must be served the human element, scientifically planned road systems ought to be devised so that railways, roads and the economic value of land might be made to fit in with each other.

When Time Was Precious
Bell applied for a patent on his telephone, February 14, 1876. The same day, Prof. Elisha Gray rushed into the patent office with almost identical the same device.

After years of litigation the nation at Supreme Court decided in favor of Bell.

Bell got to the patent office a few hours ahead of Gray. The short delay cost Gray what patent attorneys call the most valuable single patent ever granted.

Being pained by Delays
It means failure. As Napoleon put it: "Every hour of indecision increases the chance for disaster."—Bulfinch Times.

Wild Fruit Crop
Manitoba has a good wild fruit crop in prospect according to Prof. W. H. Hogg of the Horticultural Department of the Manitoba Agricultural College. Wild raspberries, plums, Saskatoon, choke cherries, cranberries and other native fruits have been shown abundantly.

Special wireless sets are being used in America for the use of cowboys while riding on their rounds.

There are no living descendants of Shakespeare, Shakespear, Dryden, Swift, Caution, Pope, Shelley or Byron.

England has a surplus of 2,000,000 women.

A. N. O. 1355

Control Grasshopper Menace

Insect Pest Sears in Districts Where Birds Are Plentiful

"It is almost a certainty that in the southeastern part of Saskatchewan where the hoppers have been most prevalent during the last three years, conditions will not be nearly so bad this year," states M. P. Tullis, Commissioner of Field Crops, Provincial Department of Agriculture. "Field Representatives in that territory who have been making surveys report good grain sources and there is a feeling of optimism among municipal councils and farmers generally. It is hoped that the control measures employed there in the past, the work of the association has reduced the numbers of the pest so that the danger period is practically over."

The first grasshopper mowing station to open in the province were in the neighborhood of Saskatoon, Dundas, Estevan and Yorkton, which opened up on May 25, and Delta, Broderick, Teesdale, Conquest, Webb, Assiniboia, Vanguard and Neville, and a few other points opened a week later.

The present situation in regard to outbreaks of grasshoppers is quite different to what it was at this time last year. Just a year ago, by far the largest quantity of supplies were being moved out of the third meridian and ninety per cent. south of the Qu'Appelle Valley. This year nearly all of the material shipped was from the warehouse have gone west of the third meridian and about equally divided between north of the Qu'Appelle and South Saskatchewan Valleys and south of this line.

There are practically no hoppers north of the second meridian, and bush areas have been almost wholly free from hoppers each year since the pest appeared in Saskatchewan. This is due to all practical purposes to the presence of much larger numbers of birds that live on insects.

Chicks in the Diet

Builds up the Tissues and Provides Energy for Body to do its Work

It is a remarkable fact that although Canadian chicks are equal to the finest of their class in the world, there is not one Canadian chick available in Canada as in many other countries. In England, for example, a large percentage of the homes use chick almost daily. To some people, chick is believed to be indigestible, but as pointed out in Pamphlet No. 1, it is one of the best muscle builders in Ottawa. Its digestibility is improved when combined with other foods. When eaten with bread, cereals, or starchy food such as potatoes, or macaroni, it forms one of the most energy for body to do its work, and one which will not be difficult of digestion for most people. It is when eaten at the end of a heavy meal that it is liable to overtax the digestive organs. (Chick is a very concentrated diet, nearly all of it being made up of protein.)

The use of chick in the diet is the result of British enterprise and organization. Traders of all nations welcome the security which they assure and which is such a striking contrast to the piracy and insecurity under the old rule.

The island that is the finest roads in the Far East, and some of the most beautiful buildings, including magnificent law courts, with the same law for Chinese and British, and a university, for Chinese, where degrees can be obtained equal in status to those of a home university.

Recently, for the Bachelor of Science degree in engineering the final papers were sent home to the London University to be marked. They were returned marked "With honors." No mean thing for Chinese students to accomplish!

The area of the colony being studied by the surrounding sea, the value of land is constantly increasing, and in the business quarters of Victoria, the chief city, office rents are as high as in the heart of the City of London.

The use of chick is not the largest port in the world, but it is the natural distributing center for the whole of South China, and as transport facilities are improved on the mainland and trade increases, so Hong Kong must grow in importance, wealth and power.

The great need of the colony is cheap coal, and if this becomes available there is no doubt that Hong Kong, the more desired haven of ships, will become one of the largest industrial centers in the world. Already the coal mines at many places enter and leave the port as ships enter and leave the great Port of London.

The rise of this land from obscurity to wealth and fame in the course of less than a century is one of the romances of commerce.

No Disgrace

Jack—Did you recognize him?
Edith—Only his wife.

Rural Schools Crowded

Raising School Age in Saskatchewan Causes Complications

As the result of the new regulation passed at the last session of the Legislature raising the compulsory school age in Saskatchewan to 16 years, many of the school houses in rural districts of the province are crowded to capacity, and a few of them are not sufficient accommodations for all the pupils affected by the new act, according to information which has reached the Department of Education.

"The department has become acquainted recently with a number of cases where insufficient accommodation will be found in the schools for the children who are to attend," A. H. Ball, Deputy Minister, is quoted as stating. "This is true of a number of rural schools, especially."

Mr. Ball stated that the only way to meet the difficulty will be for some of the schools to increase the size of classrooms to provide for the compulsory education, regard must always be had to this contingency.

It is pointed out that in cases where there is not sufficient school accommodation available right on the spot, the act will not be strictly applied so far as the older pupils are concerned, until space can be provided for the classes.

Girdling the Globe

Whispering Voices that Seem to Come from All Quarters

Miracles never end. France is today completing near Paris a radio station which will communicate with Saigon in Indo-China, a distance of 5,000 miles. While Holland will have a station which will talk with Java, over a distance of 1,200 miles. This means that countries, whether great or small, can actually make themselves heard throughout the world. It is not far from London to the Pacific, and London will have a station which will talk with the Pacific. Land and sea, mountain and valley, prairie, jungle and forest never hope to reach that high place in life which is their heart's dream today.

Take a map and see what happens to a word on its flight from Holland to India. It travels over Germany, it lands at the network of Italian highways. It leaps, drenched, across the Black Sea. It trips lightly over the mountains of Russia. It reaches India it scarcely halts, and thus it reaches its goal. Unchecked and unimpeded, it is a perfect symbol of the power of international trade, international finance, international art, international science, international religion. India is the one touch of science that makes the whole world kin. It adds to man's genius a spark from the genius of God.

Slowly but surely science is healing the wounds of war, and in two ways, the mental and the physical. The culture, and, secondly, by making the laws of peace too strong to be broken. When it is possible, as soon as it will be for a speech delivered in America to be heard in China, the east will better understand the west, and the west will realize that whatever they say to their own countrymen is overheard by their neighbors. Peaceful persuasion will then be possible and the Parliament of man, foretold by Tompkins, will be a reality.—New York Mail.

Income Tax Returns

During the last fiscal year the Dominion Government received from its taxpayers a total of approximately \$40,000,000, which is a considerable increase over the preceding year, when the returns only amounted to \$30,000,000.

The business profits tax has been brought in an additional 12,000,000. Drainage Schemes in Saskatchewan Thousands of acres will be reclaimed in Saskatchewan this season when the province will cost the Provincial Government about \$50,000.

Million Dollars for Roads

Over a million dollars worth of contracts for road and street making have been let in Ontario this year, according to official statistics. Quebec coming next with a total of \$150,000. Similar work anticipated to be done during the next year in the two provinces amounts to \$2,500,000.

U. S. Scientists Claim To Have Perfected Process For Liquefying Helium

A Little Talk on Thrift

By the President of the American Society for Thrift

This is the time of the year when thousands of our young people are leaving schools and colleges to take up the practical responsibilities of life. They are looking forward with high ambition and a firm determination to make the most of the great years that lie ahead of them.

Whatever life may hold for the individual during the next fifty years, it may be accepted as a matter of certainty that life during this era will be more interesting than ever before. With the rapid progress now being made in many branches of science, one cannot, by the widest stretch of imagination, picture what wonders will be seen and experienced by those who are alive fifty years hence.

But the fundamentals of human progress are as changeless as the sea, and those who go the furthest in life's accomplishments will be so because of their adherence to those elements of success that among which is the practice of broad constructive habits.

This does not mean alone economic matters, but it means in a word the elimination of all forms of waste. One of the penalties of inactivity in practical matters is one's failure to appreciate the value of life. Of course, thrift is essentially a conservation of the so-called unimportant things.

Those who are thrifty are systematic and progressive. They know how to stop up the little leaks. The elimination of life moments that are not worth, just as the saving of a few dollars here and there means a substantial accumulation.

He willing to sacrifice small pleasures for the good of your career. Work systematically toward the one great purpose you have in mind. Do not let your arrival at the goal of your ambition too soon. Learn the value of patience.

There are many persons who life can teach that are of more practical value than these, and we hope that among the young men and young women who are going out into the world of experience at this time may be imbued with the spirit of true thrift for otherwise they will never hope to reach that high place in life which is their heart's dream today.

Above Petty Meanness

British Always Show Kindness Even to Their Enemies

It seems, sometimes, as if British were constantly being the divine command: "Love your enemies." This is a very old command, and it is one which is expressed in the words of the Bible. The British are not a nation of petty meanness. They are a nation of kindness, and they are a nation of kindness to their enemies.

It is a very old command, and it is one which is expressed in the words of the Bible. The British are not a nation of petty meanness. They are a nation of kindness, and they are a nation of kindness to their enemies. The British are not a nation of petty meanness. They are a nation of kindness, and they are a nation of kindness to their enemies.

It is a very old command, and it is one which is expressed in the words of the Bible. The British are not a nation of petty meanness. They are a nation of kindness, and they are a nation of kindness to their enemies. The British are not a nation of petty meanness.
